Rockwell Automation, a Rockwell Automation Company

Rockwell Automation's new 1756-PLC-3 is a high-performance, compact PLC designed for demanding industrial applications. It features a powerful processor, extensive I/O capabilities, and a rich set of communication options. The PLC is housed in a rugged, industrial-grade enclosure that is easy to install and maintain. Its compact size makes it ideal for space-constrained environments. The 1756-PLC-3 is compatible with Rockwell Automation's extensive software ecosystem, including Studio 5000, providing users with a familiar and powerful development environment. Its advanced features and reliable performance make it a top choice for industrial automation professionals.
